ABOUT ME

Web developer with experience in creating smooth, modern, and responsive designs. I enjoy exploring new technologies and being update with it. I have worked-on fullstack applications using Laravel and the TALL stack. Aside from Web development I also have experience with computer troubleshooting, hardware and software and basic networking

TECHNICAL SKILLS

- **Programming Languages:** PHP, JavaScript, TypeScript, HTML5, CSS3, SQL
- **Frameworks & Libraries:** Laravel, Livewire, Next.js, React.js, Alpine.js, Tailwind CSS, DaisyUI, Bootstrap 5, jQuery
- **Databases & Cloud Services:** MySQL, Firebase, Sevala, Railway, Laravel Cloud
- **Development Tools & Workflow:** Git, GitHub, Docker, WSL, Linux, DDEV, GlazeWM

PROFESSIONAL EXPERIENCE

Repay.ph | Muntinlupa, Metro Manila

Jr. FullStack Developer (October 2025 – July 2026)

- Maintained and enhanced existing full-stack applications, improving codebase reusability and maintainability through targeted refactoring.
- Diagnosed and resolved critical frontend/backend issues submitted via the QA issue board to preserve software stability.
- Enhanced UI/UX for end users and collaborated across cross-functional teams (DevOps, Mobile, Backend, and Creatives) to synchronize feature rollouts.
- Utilized containerized local development environments (Docker, WSL, DDEV) and Git version control workflows

CvSU - Silang Campus | Cavite

Web Developer – On-The-Job Training (March 2025 – June 2025 / 486 Hours)

- Engineered the migration of the Bayani OneSys platform from v1 to v2, rewriting the entire system using the TALL stack (Tailwind, Alpine.js, Laravel, Livewire) to optimize long-term maintainability
- Designed and executed a custom data migration pipeline to securely transfer live resident records and certificate configurations from Firebase/legacy databases into a unified relational schema
- Upgraded system security, access control logic, database query efficiency, analytics reporting, and automated certificate generation

Bayani OneSys for Metro Bulihan | Cavite

Developer / Capstone Project (October 2024 – January 2025)

- Co-developed and deployed a multi-tenant Centralized Record Management System serving localized barangay units with isolated resident data, user roles, and certificate workflows
- Interacted directly with barangay clients during initial rollout, onboarding 3 active barangay units to streamline daily administrative operations
- Built core features using Laravel, Firebase Realtime Database, Bootstrap 5, and jQuery before the system was formally turned over to CvSU for long-term maintenance

PROJECTS & OTHER INTEREST

Personal Portfolio Website | React.js Web Project

- Designed and built an interactive, responsive developer portfolio using React.js and Tailwind CSS for styling to showcase web applications, projects, and technical skills.
- Implemented clean component-based architecture and state management for optimal performance across desktop and mobile browsers

Budget CNC Pen Plotter | College Hardware Project

- My team and I built a low-cost automated CNC pen plotter utilizing a wooden chassis, stepper motors, and open-source GRBL firmware.
- Flashed and configured GRBL firmware for G-code machine control and hardware-software integration.

Computer Maintenance | Personal

- Experienced in desktop PC and laptop assembly and disassembly, basic hardware and software troubleshooting, re-installing of operating system, component cleaning, and thermal application

CERTIFICATIONS

- **AML/CTF Fundamentals Certificate** – Anti-Money Laundering Council (AMLC) Secretariat (Issued on May 2026)

EDUCATION

2021 - 2025 College	Cavite State University - Silang Campus Bachelors of Science in Information Technology (BSIT)
2019 - 2021 Senior Hight School	National College of Science and Technology Institute of Industrial Research and Training
